

Application

During storage, transportation and operation of LIT it is strictly forbidden to conduct heating above 85 C, charge, short-circuit, expose to open flame, discharge in modes not provided for in the technical conditions, deform and open, allow direct contact with water.

Parameter Name	Value
Open circuit voltage (V)	25.50
Rated capacity (A·h)	22.00
Final discharge voltage, not less than (V)	20.00
Maximum amperage (A)	2.20
Temperature range (°C)	-30..+60
Weight (kg)	1.90
Rated Discharge Current (A)	1.00
Warranty period (years)	3
Electric energy (W·h)	500.00
Fixed Power (W)	10.00

During storage, transportation and operation of LIT it is strictly forbidden to conduct heating above 85 C, charge, short-circuit, expose to open flame, discharge in modes not provided for in the technical conditions, deform and open, allow direct contact with water.
