10 MRL-800-N

Application

Lithium batteries are the primary current sources of constant readiness and are intended for power supply of security systems, alarm systems, stationary and mobile communications, as well as for autonomous (emergency) power supply of automation and communication facilities, gas and oil pipelines in case of violation of standard power supply systems.

Parameter Name	Value
Voltage (V)	30.00
Rated capacity (A·h)	700.00
Maximum amperage (A)	5.00
Temperature range (°C)	-20+50
Warranty period (years)	10
Weight (kg)	103.00
Maximum impulse discharge current at l.p.d(A)	10.00
Rated Discharge Current (A)	1.00
Final discharge voltage, not less than (V)	20.00

During storage, transportation and operation of LIT it is strictly forbidden to conduct heating above $85\,^{\circ}$ C, charge, short-circuit, expose to open flame, discharge in modes not provided for in the technical conditions, deform and open, allow direct contact with water.
